DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-23, drawn to a media provider system with a master server,
 customized files, a duplication job, classified in class 360, subclass 137.
- II. Claims 24-34, drawn to a method of recording, selecting file, customized requirements, printing and label for the recording files, classified in class 369, subclass 30.

A. The inventions are distinct, each from the other because of the following reasons:

Inventions I & II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP 806.04(h)). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 09/775,935

Art Unit: 2142

J. 128

B. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

C. Because these inventions are distinct for the reasons given above and the

search required for Groups I & II are different, restriction for examination purposes as

indicated is proper.

D. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicants are reminded that upon the cancellation of claims to a non-elected invention,

the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of

the currently named inventors is no longer an inventor of at least one claim remaining in

the application. Any amendment of inventorship must be accompanied by a

diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR

1.17(h).
